FY22 NDAA FOR GBFMD: WHY, WHAT and HOW

TOGETHER, WE DELIVER.

3+ years of logistics studies and wargames have documented challenges related to the delivery of bulk fuel in a contested, distributed conflict against a near-peer competitor.

Five strategic gaps: Logistics C2, Prioritization, Assured Distribution, Governance and Human Capital.

For over 2 decades, DoD became comfortable with contracted fuel distribution in IRQ and AFG, but future contested and distributed operations will be radically different.

FY22 NDAA

What we will do:

Synchronize DLA's core competency of procuring and managing the CLIII(B) commodity with USTC's core competency of global distribution, C2 and prioritization.

New UCP mission for USTC while DLA retains all its commodity procurement and management responsibilities; DLA Energy will not realign to USTC and no CCMD or Service authorities or responsibilities will change.

How we will do it:
